| • React Native | • JavaScript | • Java | • PostgreSQL | • MongoDB | • TensorFlow |
| • Angular 2.0 | • Python | • C++ | • SQL Server | • Firebase | • VS Code |

PROFESSIONAL EXPERIENCE

UPNFM Research Observatory website, UNITEC linking Project - (April 2025 - October 2025)

Worked as a **front-end developer, UX designer, and occasional Scrum Master** in a team developing a website from scratch, for the research department of Universidad Pedagógica Nacional Francisco Morazán, where I contributed to the following:

- Developed a website of interactive educational resources (such as interactive maps, research budgeting tools, community spaces to upload research papers and forums, etc), using React, with an Express.js backend
- Worked on UX design for most pages in the website
- Used tools such as Leaflet to develop maps, and component design for modular responsive development

Unithel landing page website (July 2025 - August 2025)

Worked as a **web developer** on a commissioned website for Unithel, a networking business in Honduras, where I contributed to the following:

- Developed a website from scratch using Wix
- Worked on responsive functionality and domain connectivity
- Participated in UX design revisions and corrections using a Figma prototype prior to development

Teaching experience (2023-2026)

Acquired teaching experience, as a lab instructor and temporary teacher, as detailed:

- Programming lab instructor for UNITEC (2023-2026)
- Short-term teacher in Oswaldo López Arellano school, in Tegucigalpa, Honduras (as part of UNITEC linking activity)
- Private tutor, specialized in math and science

EDUCATION

Software Engineering (2022-present)

Universidad Tecnológica Centroamericana
